Nana Adjoa Anim

Product Manager | Cloud & Developer Experience | Open source | PLA'25

Greater Accra Region, Ghana

Summary

I'm a Technical Product Manager with a strong background in cloud technologies, backend development, and user-focused product development. I'm passionate about building reliable and scalable products (both internal and external products) that improve observability and operational efficiency to platforms that enhance user experience and business outcomes.

Over the years, I've had the opportunity to build and contribute to products across the fintech, automotive, and agriculture spaces including inventory management system, vendor management dashboards, and ERP solutions that streamline operations and data visibility for teams.

Beyond tech, I'm deeply committed to mentorship where I help people, especially those from underrepresented groups, navigate their path in technology and build confidence to reach their goals.

Skills: Cloud Technologies, Product Management, Analytical Thinking, Problem Solving, Communication, Agile Development
Tools: Bolt, Lovable, Postman, Jira, Confluence, GitHub, Figma, AWS

Let's connect to share ideas, collaborate, or explore opportunities to build impactful products together!

Experience
